

FAS - FOUNDATION FOR AMAZON SUSTAINABILITY

Our goal is to take care of the people who take care of the Amazon. We help keep the forest standing by investing in health, education and citizenship, empowerment, income generation, community infrastructure, environmental conservation, management and transparency, research, development and innovation.

How we act

We support traditional communities in 16 conservation units of sustainable use.

Together, we help the conservation of 11 million hectares of Amazon rainforest.

Our performance earned the award of the best NGO in Brazil 2021, according to the Best NGOs Award.

How we act

INCOME AND ENTREPRENEURSHIP

Production chains

We support production chains and sustainable management in communities.

Açaí

Flour

Fishing

Chestnut

Guarana

Cocoa

Vegetable oils

Forest management

Handicraft

Tourism

Income generation and entrepreneurship projects generated monthly revenue gross average of **R\$1,678.00**. *Dados referentes ao ano de 2021*

We have the **Bolsa Floresta** program, public payment for environmental services implemented since 2008 in the UCs where we act. As of 2022, the program was reworked for Guardians of the Forest.

With the program, we served **37,458 people in 582 communities***

The benefit generated a **reduction of 43% of deforestation****

202% increase in the average income of beneficiary families***

*Data referring to Sep/2021

**From 2009 to 2019

***From 2009 to 2019

COMMUNITY INFRASTRUCTURE

We invested **R\$92,324** in improvements of infrastructure

We have developed 3 projects that involve basic sanitation, internet, drinking water and electricity

We arrived at **104 structures of connectivity** installed

INNOVATION

Through the Standing Forest public notice, we carried out the transfer of **R\$ 2.5 million** to the organizations to develop projects improvement for **11 production chains***

Our initiatives reached **1,547 families** from 126 communities in **12 municipalities** in the amazon

We installed **95 connectivity points** to health teleservice**

**Data for the years 2018 and 2019*

***Data for the years 2021*

HEALTH

We carried out **1,118 health teleservices** per year*

We trained 654 professionals through of the Health in the Forest Program

We serve 96,144 people in **905 territories**

**data referring to the year 2021*

EDUCATION AND CITIZENSHIP

Since 2012, the **Education for Sustainability Program** promotes relevant education, citizenship and public policies

There are **505 communities benefited** by **40 projects**

577 students enrolled in regular education in schools based in the **9 Conservation Nuclei and Sustainability** maintained by FAS

In all, **2,605 children and teenagers** participated in educational activities offered*

**Data for the year 2021*
